snið B-B

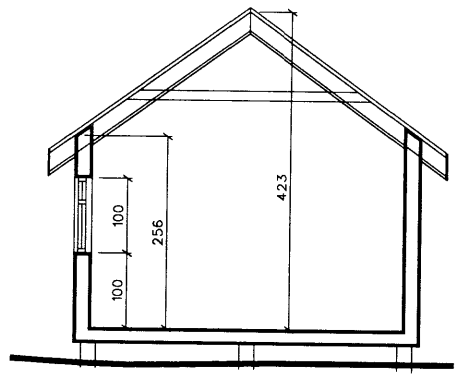

geymsla undir húsi

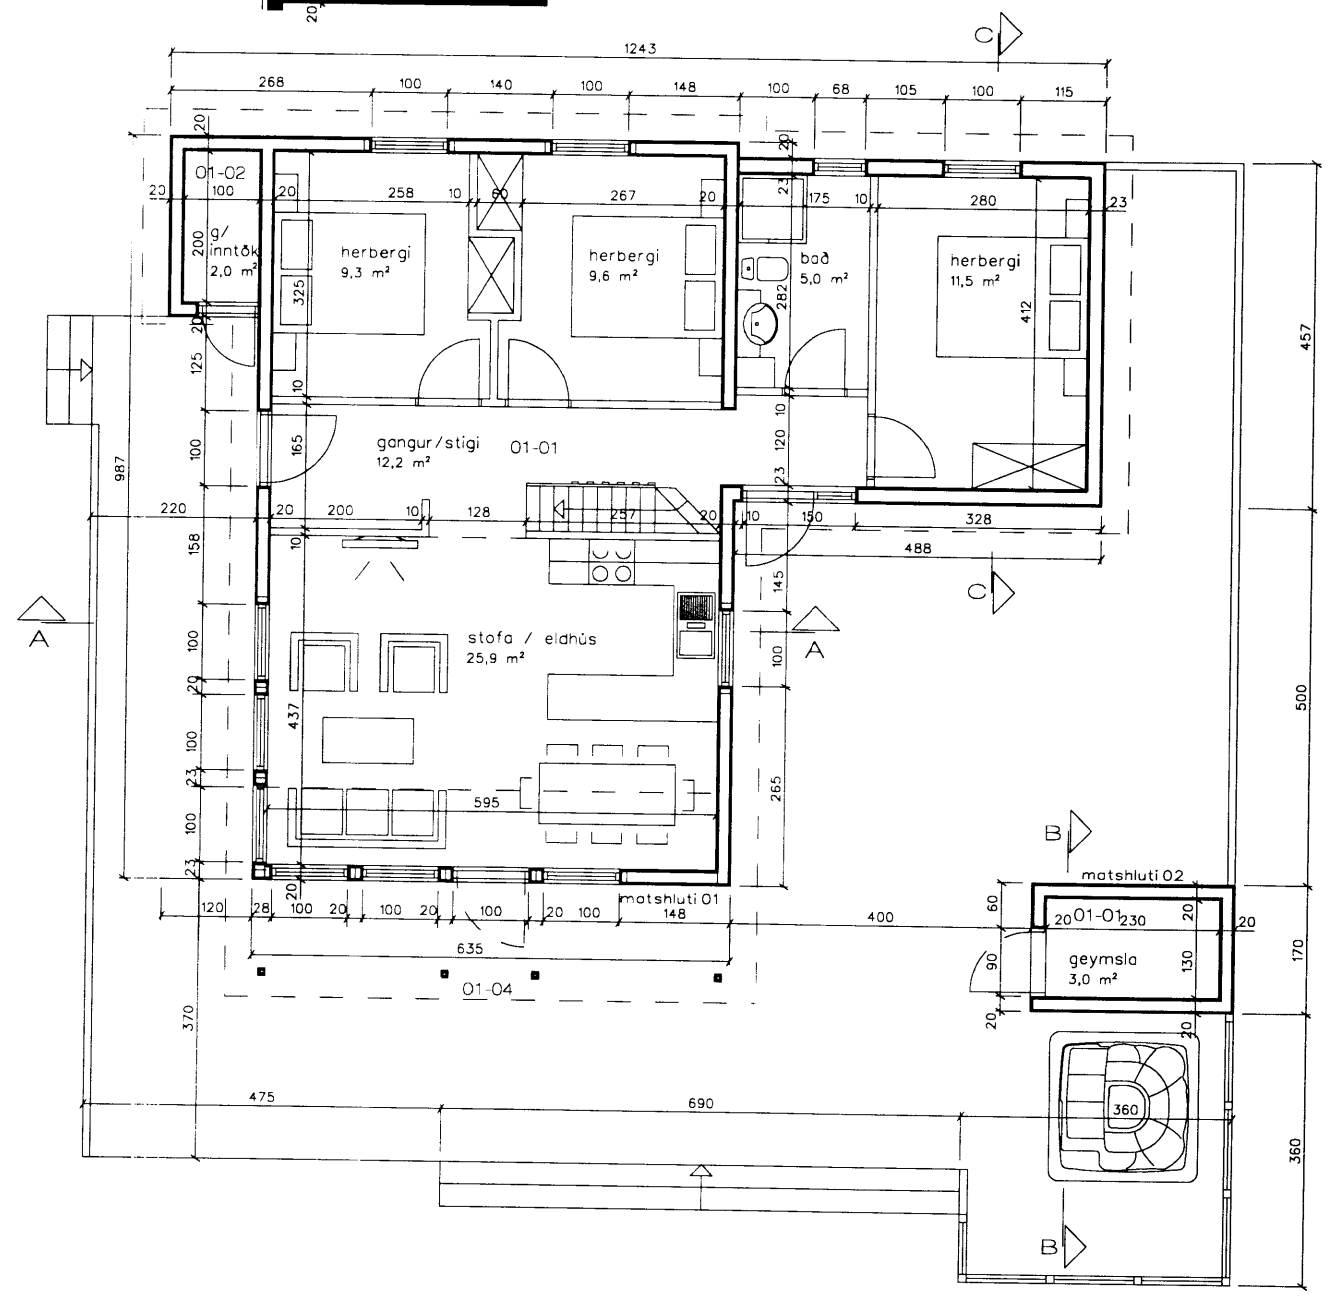

Húsið er byggt 1986 úr timbri og klætt að utan með lóðréttri timburklæðningu. Á þaki er lítað þakjárn.
 Óskað er eftir að byggja viðbyggingu til austurs og að lengja húsið til suðurs um ca 1,2 m. Gert er ráð fyrir að breyta skipulagi innanhúss.
 Efni og frágangur verða sams konar og fyrir eru.
